Educational Data Mining

- Educational Data + Data Mining

- Educational Data:

- Student data already collected by schools and universities
- Student data available from other sources, e.g., Coursera, Khan Academy, etc.
- Student data to be collected by instrumented hardware and software.

- Why EDM?

- Improve learners' performance (time, effectiveness, grades)
- Enhance learning interest
- Upgrade skills - Connect education with career
- Embrace lifelong learning

Why AI for EDM **now**?

Big Data (Text, Structured and Semi-Structured Data)

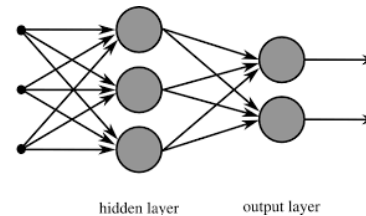

Semantic Rich

High Performance Computing

Deep Learning

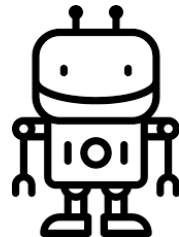

Mobile Technology

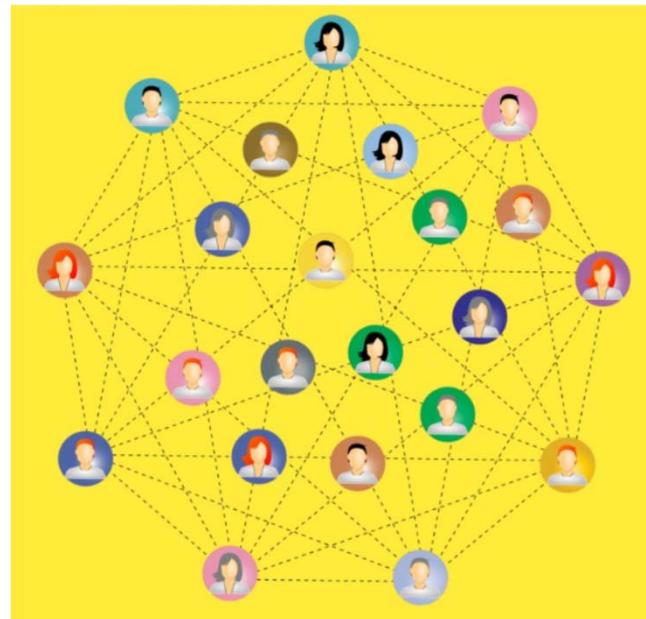

Types of Educational Data Mining

- Student Profiling
- Grade Prediction
- Course Recommendation/Planning
- Intelligent Tutoring
- Interactive Learning

Challenges

- Data availability
- Multidisciplinary
- Explainability
- Learning is Social

Thank you

Personalized Participatory Nation
