

#### Singapore University of Technology and Design

A Better World by Design

Professor Pey Kin Leong Associate Provost for Undergraduate Studies and SUTD Academy

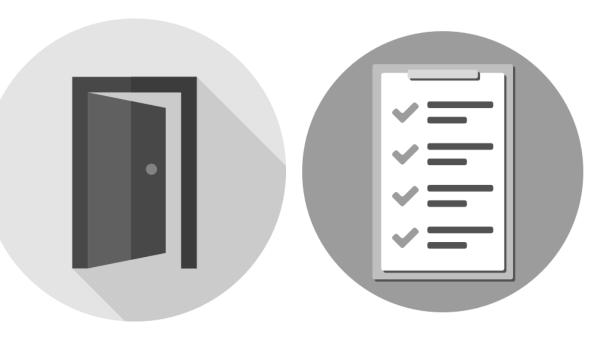

## SUTD Academy's Approach

Open and Accessible Admission
Industry Relevance
Outcome-focused
Partnerships
Modularised and Flexible Course Design

#### Industry Relevance

- Demand-driven, and meet industry needs
- Developed in close consultation and delivered in partnership with industry

#### Course Design

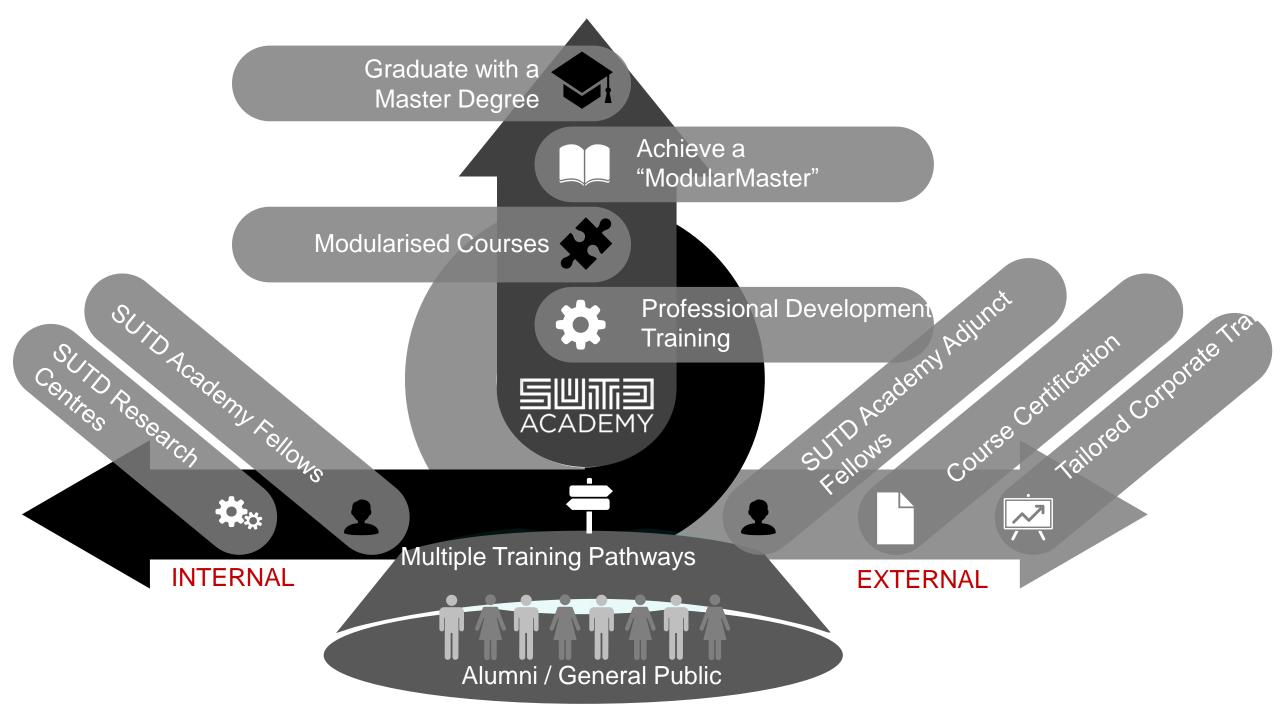

- Modular
- Bite-size
- Accessible
- Flexible pathway

#### Admission

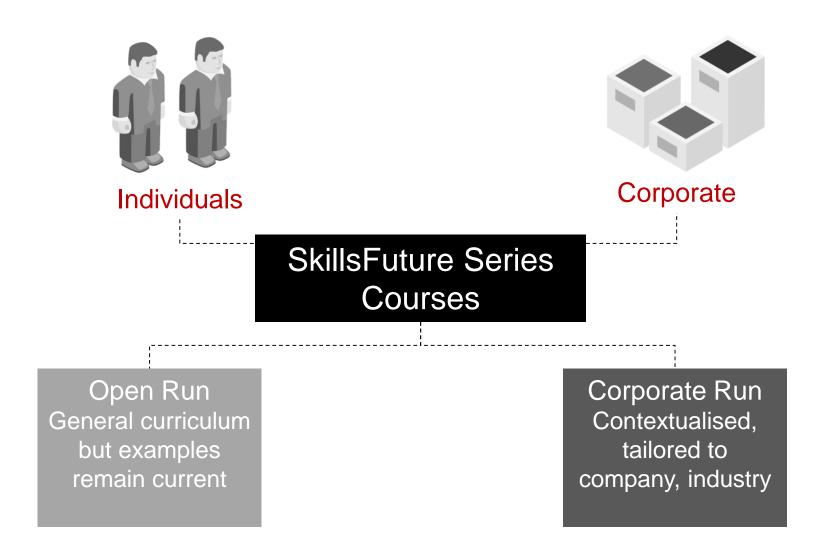

- Open and accessible to everyone
- Not based on academic grade

#### Outcomefocused

- Aims to help participants to move to a bigger or different role
- Aims to help participants to be more competent with their job.

## Target Lifelong Learners

## Case Example

A risk advisory company wishes to upskill its employees in data science.

## Open and Accessible Admission

Prospective participants are university and polytechnic graduates.

## Industry Relevance

Company sends dataset that's more relevant for the prospective participants and easier for understanding.

Learning outcomes remain the same but SUTD Academy Instructor used the dataset to provide a "contextualised" learning experience.

#### Outcome-Focused

Participants for this credit-bearing Data Science course had to work on a design project as fulfilment of the course.

Problem statements for the project are proposed by the company which are relevant to its business.

.

## **Partnerships**

Management of the company also got involved in the final project assessment and gained first-hand appreciation of participants' learning effectiveness and found new ideas and insights for the business.

# Modularised and Flexible Course Design

Participants who have successfully completed the course can look forward to taking up more relevant data science courses from SUTD Acadmey to stack up to a ModularMaster in Data Science certificate.

.

## Technology Support

Digital Manufacturing and Design (DmanD) Research Centre

Advanced digital design and manufacturing facility and equipment

iTrust Research Centre

Advanced cybersecurity facility and equipment

IDiA Lab

and more

AR/VR, Digital Media equipment

## \*Design Innovation Mindset

Cultivates positive and optimistic attitude.
Unlocks and drives the appetite for ambiguity and curiosity.
Fuels the desire for innovation and continuous learning.
